LIVE GEO™ quickstart guide

One app, zero paperwork

Mate, we're stoked to bring you Live Geo.

This is game-changing software designed by drillers, for drillers.

Ditch the paperwork and use Live Geo to log as you go.

Predrills

Drill logs

Soil logs

Water logs

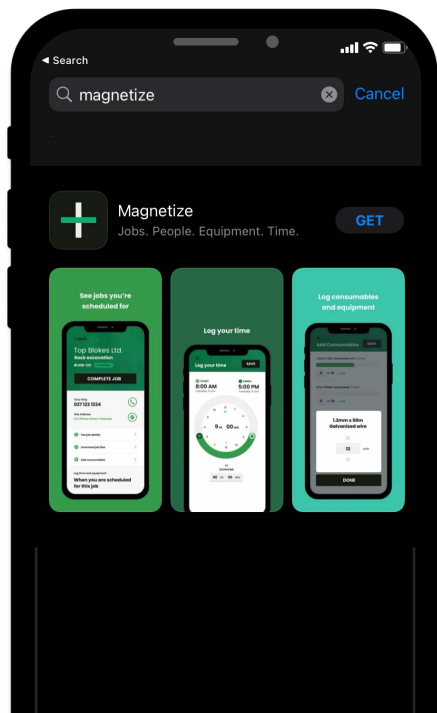

1 Get Magnetize

Your manager or administrator will create a Magnetize account for you. Look out for an email with a link to set your password. You can do this step from your computer, smartphone or tablet.

2 Download the mobile app

Now jump over to the App Store (Apple) or Play Store (Android), search for **"Magnetize"** and download the Magnetize app. Sign in using the same email address and password. The app works on tablet and iPad too.

Magnetize™ MOBILE APP

See jobs assigned to you, and update them as you go about your work day.

Log in seconds:

- your time
- equipment & consumables used
- files, notes & photos

3 View your jobs

When you log in, you'll see all the jobs you're booked on today, tomorrow and this week. Tap on them to view their details.

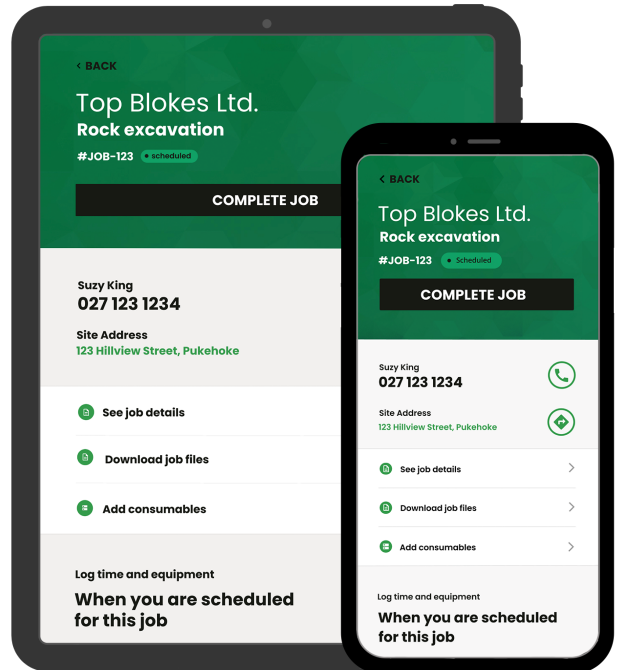

? *Not seeing any jobs? Talk to your manager. They may still need to book you on jobs in Magnetize.*

4 Add a hole (BH or CPT test)

When you get to site, find the job in the app and tap on + Add hole.

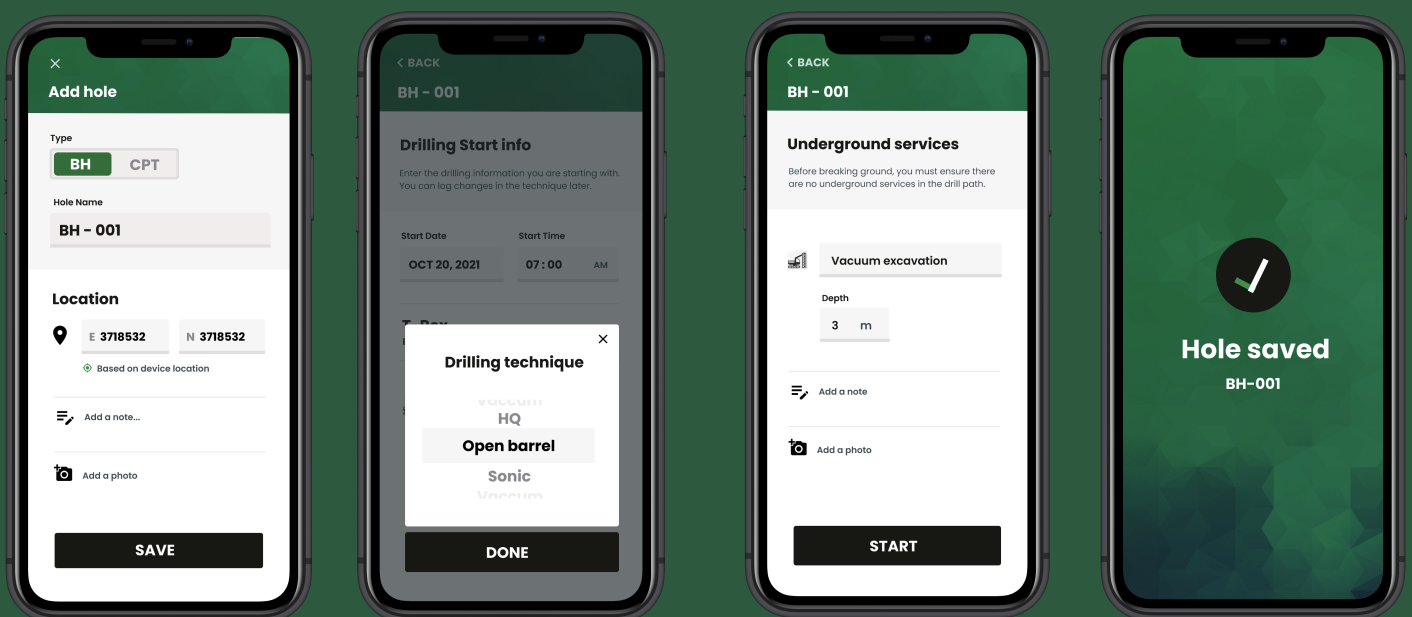

Use the toggle to choose bore hole (BH) or CPT (test). Save the hole by confirming the hole's name and GPS location.

5 Predrills done in a few seconds

Live Geo will ask you to choose the rig and drilling technique you're starting with. If underground services clearance is required, you can record the technique and depth.

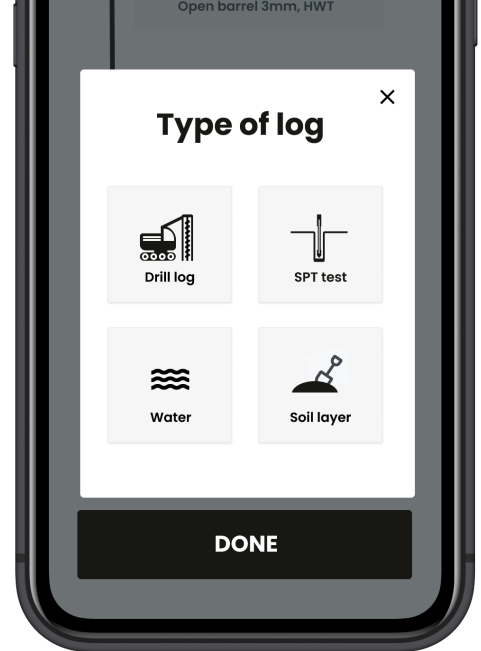

6 Log as you go

Once you've broken ground, you can record SPT tests, water level, piezo and soil layers as you go, straight into Live Geo. No paperwork!

Notes and photos can also be added alongside any log.

The rest of the team can jump in and add logs too at the same time. (hence the name Live Geo!)

CPT Tests

	START	FINISH
qc	219.033	219.033
fs	275.67	275.67
u2	203.00	203.00

Water level: 8.0 m

SPT Tests

SPT Blows: 3 5 7 6 5 6

N = 24

Bouncing 10 blows for 5mm. 20mm remaining.

SAVE

Water & Piezo

Type: level piezo

Piezo screen depth: From 9.5 m To 9.0 m

SAVE

Soil layer

Start Depth: 0 m End Depth: 2.6 m

Soil Layer description: Made ground

Top soil is gritty. Plenty of worms.

SAVE

7 End hole

When you've finished adding logs, tap on **End Hole**. On this screen, you'll confirm:

- End depth
- Casing option
- Casing depth

✓ **End Hole**

8 Log your mahi

Finally, back on the job details screen, log your mahi (work) for this job:

Add your time

On the job details screen, scroll down to the scheduled dates and add your time on the job for each day. You'll also see team mates' time logged.

Equipment time

Add equipment used, and the hours.

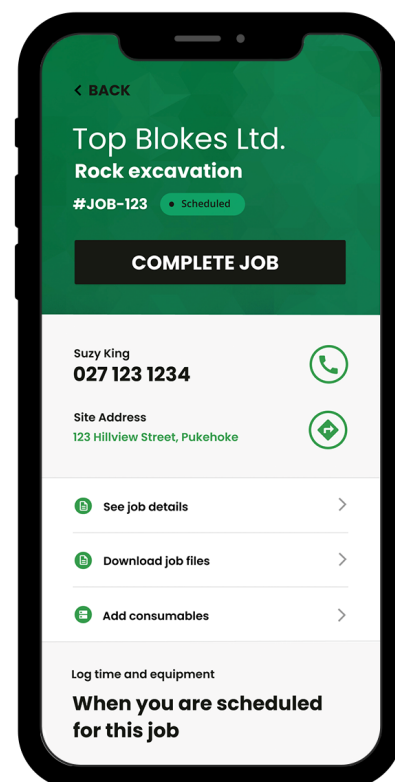

Consumables

See consumables quoted with the job, and add quantities used to the total.

Notes and photos

Add notes and photos to the job's timeline.

If the job is now done for the customer, tap **complete job**.

Give us a call

We're keen to hear how you got on,
and are here to answer any questions.
